

LUBMARINE PRODUCTS

ENGINE OIL

PRODUCTS	DESCRIPTION	APPLICATIONS
System Oil	ATLANTA MARINE D3005	Low speed cross-head engines. Lubrication of bearings, oil piston cooling.
Cylinder Oil	TALUSIA HR 70	Designed to lubricate liners and rings in cross head diesel engines with high firing pressure.
Cylinder and Motor Oil	DISOLA M	The ranges of M4015 and M3015. Lubrication of shaft bearings and stern-tubes
	DISOLA DD40	Lubrication of turbo-charged diesel engines running under severe condition. Good for transmission converters.
	DISOLA W	Lubrication of diesel engines whether turbo-charged or naturally aspirated. Suitable for lubrication of petrol engines
	DISAL CF 113F	Detergent oil for diesel engines built by the electro motive division of general motors
	AURELIA XL 4030 and 4030	Lubrication of medium-speed engines, running on heavy fuel oil with high sulphur content, reduction gear lubrication

GREASE

PRODUCT	DESCRIPTION	APPLICATIONS
Grease	CERAN AD,CERAN WR2 MULTIS EP 2	Lubrication of open gears and wire ropes operating under the severest condition.

AUXILIARY OIL

PRODUCT	DESCRIPTION	APPLICATIONS
Auxiliary Oil	VISGA RANGES	VISGA 46, 68, 100, 32. All have various roles they play to satisfy wide temperature variation and viscosity ranges encountered with modern hydraulic systems. Used in all hydraulic equipments operating in extreme temperatures like steering gears, remote control system.
	EPONA Z RANGES	EPONA Z 150,100,220,320,460. They are extreme gear oils suitable for all bearings, gears which require “extreme pressure lubricant. Deck machinery, elevators are typical places of application

OTHERS

PRODUCT	DESCRIPTION	APPLICATIONS
Others	DACNIS P RANGES	Mineral oil air compressors for heavy duty turbo-charged engines
	BARELF RANGES	BARELF CH 100 AND 68 are synthetic air compressors for vacuum pumps and rotary screws of heavy duty turbo-charger engines.
	BARELF AL RANGES	BARELF AL100 AND 150 are synthetic oil for refrigerating compressors.
